

Full-air

Renault Master, Opel/Vauxhall Movano, Nissan NV400
(X62 Model for Aftermarket)

Product Information

The Renault Master and its partner equivalents of Movano from the Opel / Vauxhall / GM group and the NV400 from Nissan are a highly popular model and favourite for the commercial and leisure vehicle markets in Europe. Drive-Rite were delighted to work alongside the Renault team to develop an air suspension system that respects the wishes of the Manufacturer and at the same time meet the high expectations and demands of its customer base.

The result is an easy to install air suspension for the rear axle that provides a comfortable ride under all loaded conditions. The system is flexible and can be tailored to suit individual needs. For easy loading and unloading the system can lower to its minimum height and thus providing a small incline for easy access

of goods or people and wheelchairs. Extra height and ground clearance is provided as an option – an ideal benefit if driving over an embankment or incline.

The Intelliride system has automatic load levelling at each height. The system continuously monitors inputs and component performance as a means of increasing safety and durability. The system recognizes and responds accordingly to potholes, cross-articulation and extended turns. This intelligence prevents unnecessary activity and air consumption. The system even recognizes unachievable heights, assisting in the prevention of possible damage above or below the vehicle.

Benefits of Drive-Rite Air Suspension:

- + Increased comfort and enhanced driving experience
- + Vehicle stability safely improved under all loaded conditions
- + Vehicle less sensitive to high cross winds resulting in reduced sway and improved handling
- + Individual adjustment of the air spring pressure allows side to side height adjustment
- + Optimized geometry (drive line angles)
- + Constant ride height – load independent
- + High-quality components manufactured in Germany, USA and Ireland
- + Easy to install and user friendly systems
- + Air Springs made by Firestone, the world's No 1 Air Spring Supplier
- + Reliable: Drive-Rite has more than 25 years of experience in air suspension business
- + Fully tested, approved and homologated by the Original Equipment Manufacturer and VCA

Full-air

Renault Master, Opel/Vauxhall Movano, Nissan NV400 (X62 Model for Aftermarket)

Complete Suspension Solution

Drive-Rite full air kits come complete with all necessary parts, are easy to install, require no drilling and fully tested and approved to the highest standards.

Handheld Controller

The Drive-Rite Handheld

► Technical Specifications

Model	Renault Master, Opel/Vauxhall Movano, Nissan NV400
Year	from 2010 to present day
Kit Number	• DR.05.013651
Air spring Style	Firestone, Sleeve Air Spring
Kit Weight	+15 kg
Control System	IntelliRide, a user friendly Automatic height control system.
Compressor	AMK 12 V, max. 12 bar
Height Range Automatic mode	Ride-Height up to Raised Height: +3cm Ride-Height down to Access Height: -6cm
Height Range Manual mode	Maximum Height from Ride-Height: +5.5cm Minimum Height from Ride-Height: -6cm
Approvals	LONO - Renault,
Additional Notes	Full-Air Suspension kit for Rear Axle.
