

# GLIDE RITE®

**NEW - SPECIAL DUTY KIT**  
+ Glide-Rite Suspension System  
+ KONI Shock Absorbers

## ULTIMATE SUSPENSION SYSTEM UPGRADE

The Glide-Rite Special Duty Kit combines our advanced suspension technology with KONI Special ACTIVE shock absorbers to deliver exceptional stability, control, and comfort in all conditions.

Designed for motorhomes, campervans and light commercial vehicles operating under heavy loads or challenging terrain, it provides a smoother, safer and more confident drive wherever the road takes you.

## WHEN DO YOU CHOOSE THE MAD SPECIAL DUTY KIT?

Special Duty Kits are composed for extreme conditions, where the standard shock absorber cannot sufficiently control the improved MAD suspension system. Ideal in the following situations or if the end user has specific requirements:

- Heavy payload
- Driving on unpaved roads
- Raised centre of gravity due to body or roof cargo
- Fragile cargo requiring extra protection
- Wish to reduce driving and interior noises
- Need for increased driving comfort

## Transform Your Journey with Glide-Rite

## Glide-Rite Special Duty Kit + KONI Special ACTIVE Shock Absorbers

Built for vehicles that work hard and travel far - the **Glide-Rite Special Duty Kit** combines our advanced air or coil suspension with **KONI Special ACTIVE** shock absorbers to deliver outstanding comfort, stability, and control.

Using **KONI's FSD** (Frequency Selective Damping) technology, these shocks automatically adapt to road conditions, softening small bumps while firming up for sharper control on rough terrain or heavy loads. No electronics, no switches, just smart mechanical precision.

Perfect for motorhomes, campervans and light commercial vehicles, this system transforms handling under load, reduces body roll and provides a smoother, more confident drive on any surface.

### Key Benefits

Maximum stability  
and ride comfort

Improved handling  
under heavy loads

Automatic damping  
adjustment (FSD technology)

Twin-tube design for  
strength and durability

Full integration with  
Glide-Rite suspension

Proven reliability for  
demanding conditions
